KMWE offers total solutions in precision handling and motion systems and the assembly of modules for the high-mix, low-volume, high-complex market. With a total of 300 employees (250 employees in the Netherlands, 35 employees in Malaysia and 35 employees in Turkey) KMWE carries out engineering, prototyping, 24/7 robotised machining of parts up to 2500 mm, assembly and testing, all under its own roof. Lean manufacturing, smart manufacturing technologies and process control for low/medium-volume, high-mix applications are deeply integrated. New developments can be manufactured quickly by KMWE's own prototyping facility and the gained experience can be used for a quick launch of serial production. Combined with an international network in sourcing (including LCR), a sharp eye on market developments and dedicated account teams KMWE is your source for repeated quality and security in production and assembly.

KMWE is successful in the following markets:

- Aerospace and defence
- Semiconductor
- Science & industry
- Medical
- Diagnostics
- Analytical
- Solar

KMWE offers solutions on:

- Handling systems of fragile materials and fluids
- Positioning Systems
- Complex machined parts
- Cost reduction by value engineering
