**Newport, Your High-Precision Motion Systems Solution Provider**

With Newport, you can rely on an experienced partner in high-precision motion systems design to analyze the feasibility of your project and to support you throughout the lifetime of your system. From simple sub-assemblies to complex multiaxial systems, we constantly focus all our efforts to deliver high-performance systems to our customers at the right price.

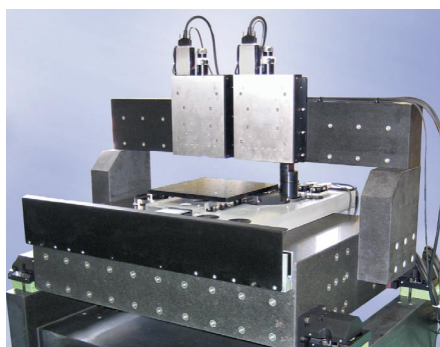

**SUB-ASSEMBLIES**

These are economical micropositioning solutions devised exclusively from Newport's standard catalog components. We add value by optimizing the performance level of these components to your requirements, committing ourselves to the global specifications of the system by performing metrology before delivery.

**CUSTOMIZABLE TECHNOLOGICAL PLATFORMS**

These offer an excellent return on investment for industrial customers looking for automated high-precision positioning solutions to achieve yield, productivity and performance improvement in their process and to cut down on production costs.

**ADVANCED MOTION CONTROLLERS**

Newport has decades of expertise in developing advanced motion controllers for systems solutions. Combined with advanced software

tools, our XPS motion controller provides users with powerful programming functionalities and control features that improve the most demanding motion applications.

**ADVANCED CUSTOMIZED SYSTEMS**

These tailor-made pieces of technology represent the pinnacle in Newport's systems design capabilities and usually integrate multiple precision technologies. They are targeted at customers requiring custom systems.
